Content

The extract files are created monthly in tab-delimited ASCII text file format and contain:

- **Official voter registration information** (active and inactive registered voters only). This information is extracted from the Florida Voter Registration System (FVRS). FVRS contains the 'official list' of registered voters in the State. The information in the monthly disk reflects voters (active and inactive) registered officially as of the end of the prior month. Confidential and/or exempt information IS NOT included. See e.g., Section 119.071, Fla. Stat.; Section 97.0585, Fla. Stat.). All information on registered voters who are participants in the Attorney General's Address Confidentiality Program pursuant to 741.401 – 741.465, Fla. Stat., is also not included. Pre-registered voters are also not included.
- **Unofficial voting history information.** This information is derived from independently reported unofficial voting history from the 67 county supervisors of elections. The data is captured at a fixed point in time. The voting history corresponds to what was recorded under the voter ID associated with the voter at the time of voting.

As with any records, discrepancies may appear to exist, or data entry or administrative errors may exist and/or have been addressed since the end of the prior month. Please see contact information below.
